

Shaban prophet Muhammad

How proud we are as Arabs  
The language, the culture , the history  
Without us where would civilisation be, it's a mystery

The list of our accolades I had to make it shorter  
Strength in our son's so we buried our daughter

With our pens and words our traditions we saved  
With our shovels our honour preserved in shallow graves

And strength , don't talk to me about strength , the Arabs were the warriors of the land

Arrows swords and shields littered the burning sand

This bravery a blessing this bravery a curse

Over one camel we fought for? 40 years

And more

Women were objects our inheritance bridal

And everything we did was blessed by our idols

This would be our pride of Arabia

Had it not been for our saviour

One man brought us salvation  
One man lifted the entire nation

And our arabian gratitude to the best of creation  
Ridducle banishment sanctions and starvation

But alas mohammed persevered and persevered and persevered

Until finally what they had all feared

The tides shifted and the nation changed

Enlightenment began and darkness began to fade

And for all this

What did Muhammad Ask in return

For taking us out of the hellfire that burns

For taking us to the Janna away the nar?

For making remember the akhirat not just the dunya

One thing he asked

The reason we received an invitation from jaffar

The one thing he asked

Al mawadatee fil kurba

So when you get invited to celebrate

The life and the birth of the ahlulbayt

Don't belittle the event or think it's a chore

For it's the only thing the prophet ever asked for
